Toll Lekha

Smart Toll Audit & Analytics
Accurate. Automated. Assured.

What is Toll Lekha ?

Toll Lekha is an AI-driven Toll Audit & Analytics Platform that ensures accurate and independent counting and classification of all vehicles **(ATCC + ANPR)** passing through a toll plaza. It offers intelligent dashboards for monitoring toll collections and seamless reporting, promotes transparency and accountability through comprehensive audits, and continuously monitors lane closures and cash lanes to prevent unauthorized activities.

Core Features

- AI-based vehicle count & classification
- Vehicle Classification accuracy: **≥ 98%**
- Auto - generated audit / SLA reports
- Cloud-ready and easily scalable
- Vehicle Count accuracy: **≥ 99.5%**
- Integrated ANPR & FASTag validation
- Centralized dashboard & alerting
- Real-time Alerts-Mismatch transactions
- NETC Data Comparison - Cross-checks vehicle and NETC/FASTag data for audit validation

Ideal Use Cases

- MLFF corridors – Lane-less toll audit
- Cash / Extra-Wide Lanes – Surveillance & verification
- Audit Plazas – Independent vehicle monitoring
- ITS / Smart City deployments

Toll Audit   Surveillance   Vehicle Monitoring

Key Benefits

- Accurate & tamper-proof toll analytics
- Real-time auditing and transparency
- Prevents revenue leakage
- IHMCL / NHAI standards compliant

Toll Analytics   IHMCL   NHAI
